

EDUCATION

Nanyang Technological University, Singapore Aug 2023 - May 2027
Bachelor of Engineering in Computer Engineering
• Relevant Modules: Software Engineering, Data Analytics, Computer Networks, Object Oriented Programming, Operating Systems

PROFESSIONAL EXPERIENCE

AtomicVest Jan 2026 - Present
Backend Engineering Intern
• Engineered gRPC client-server communication between internal web applications and backend microservices, eliminating reliance on manual SQL queries by operations teams and streamlining access to critical data
• Diagnosed and resolved defects across KYC/KYB verification workflows built on Temporal, improving reliability and stability across distributed gRPC microservices
• Developed an RTP withdrawal feature enabling real-time payout processing, ensuring end-to-end correctness across backend microservices and transaction workflows
• Expanded test coverage across backend services by writing and maintaining comprehensive test suites, reducing regression risk and enhancing stability across feature rollouts

Elconnect, Singapore May 2025 - Jul 2025
Full Stack Web Development Intern
• Created two key admin interfaces with Vue.js, Node.js, and Express.js: a Telegram Bot broadcast panel for mass job posting distribution and a view count dashboard enables admin users to track feature engagement
• Resolved over 25 bugs across frontend and backend, enhancing cross-device user experience and stability across browsers and devices
• Implemented 10+ smaller features such as input validations, UI enhancements, and dashboard filters to boost usability.
• Implemented structured JSON-LD templates for job postings and FAQs, enabling Google Search Console to detect and index job postings, contributing to a ~20% increase in overall organic traffic

United Overseas Bank, Singapore Dec 2022 - Jun 2023
Financial Information Management Intern
• Developed SQL test scripts for User Acceptance Test (UAT) cases, systematically identifying and addressing any issues emerged during testing for the "Basel IV" project
• Tracked and documented database issues in JIRA, facilitating efficient debugging and resolution by the development team.
• Devised and implemented Python scripts to automate time-intensive tasks, including the comparison and analysis of Excel sheets, significantly improving efficiency and accuracy.

PROJECTS

Defence Science and Technology Agency (DSTA) Jun 2025 - Jul 2025
TIL-AI (Hackathon - Novice)
• Fine-tuned an ASR model using Whisper AI & Hugging Face; achieved ~90% accuracy
• Finished Top 17 team in Novice category; project included OCR, CV, ASR, and RL components

ChildConnect Jan 2025 - Apr 2025
Software Engineering (APP development)
• Drafted 70+ page SRS; built UI with React Native and modular backend with FastAPI
• Refactored 10+ modules to follow OOP and improve maintainability

Hospital Management System (HMS) Aug 2024 - Nov 2024
Object Oriented Programming
• Led 5-member team; developed HMS in Java applying OOP principles (Abstraction, Inheritance, Encapsulation and Polymorphism)
• Wrote Javadoc for 20+ classes for system clarity and future-proofing

Data Science project Jan 2024 - Apr 2024
Mobile Phone Prices Prediction Model
• Built NN & Random Forest models to predict prices; used NumPy, Pandas, Seaborn
• Evaluated with TensorFlow, Scikit-learn, and Matplotlib

ADDITIONAL INFORMATION

- Languages: Python, C, Golang, Java, SQL, HTML/CSS, Swift, JavaScript, Verilog, Excel
- Tools: Kubernetes, Docker, Temporal
- Frameworks: React, Node.js, Express.js, Vue.js
- Developer Tools: Postman, Git, VS Code, MYSQL, PyCharm, Xcode
- English (Native), Tamil (Native)
